**QUICK OPTICAL**

**More security**: The materials used are strong and perfectly adapted.

**Kind to your products**: The pressure of the locking mechanism is adjustable, preventing damage to products.

**Sits well on the frames**: Thanks to the quality of its grip.

**Saves time**: With its new locking system, employees spend 30% less time putting on and removing tags.

**Simple to use**: Thanks to its pincher mechanism, only one hand is needed to put on and remove this tag, making it simpler and quicker to use.

**Discretion**: Fits well into display units thanks to its design and small size.

**The Quick Optical tag also provides a support for labels.**

Available in: RF technology, AM technology

Can be used with systems on a narrow width aisle.

JM18P18 fine (metal) frames RF
